V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. statement**

Novelty (N)	Claims <u>2-22</u>	YES
	Claims <u>1</u>	NO
Inventive Step (IS)	Claims <u>5-10, 12, and 13</u>	YES
	Claims <u>1-4, 11, and 14-22</u>	NO
Industrial Applicability (IA)	Claims <u>1-22</u>	YES
	Claims <u>NONE</u>	NO

2. citations and explanations (Rule 70.7)

Claim 1 lacks novelty under PCT Article 33(2) as being anticipated by Baley. Please note, the limitation on page 11, lines 22-24 has not been read into the claim language.

Claims 1-4, 11, and 14-22 lack an inventive step under PCT Article 33(3) as being obvious over Richter et al. in view of Roethel. Richter et al. disclose a male coupling portion configured for use with a female coupling with a male probe portion and rotation actuator (see especially column 3, lines 9-16). However, Richter et al. fail to disclose the specific guide structure including the guide tangs. Roethel discloses the guide structure with guide tangs used in a similar male coupling portion. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used the guide structure and guide tangs of Roethel in the male coupling portion of Richter et al. in order to guide the male probe portion in reciprocation from its open to closed positions.

Claims 5-10, 12, and 13 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest the additional feature of the guide nut as claimed in combination with the other claimed elements.
